The Nutrire Trento project began in 2017 and is the result of a collaboration between the Municipality and the University of Trento, together with producers, business associations, researchers, professionals, schools, citizen groups and associations. All these actors work together to:

- promote more conscious consumption;
- raise awareness of more sustainable production;
- shorten the distance between producer and consumer, between city and country.

Beni Comuni

Orto Aperto

The experience has shown how a garden can be not only a source of healthy food, but also a concrete expression of authentic social engagement, enhancing wellbeing and generating significant relationships between volunteers.

Speck&Tech

Speck&Tech is the digital community of Trentino. Founded on March 1st, 2016 by a group of youngsters, who some people would define nerds or geeks, it was then officially registered as an “Associazione Culturale” on April 18th, 2017. Since its birth, Speck&Tech has always had an ambitious and precise goal (as one can still read in the motto on the homepage), that is to create a community of people, even very different from each other, united by a passion for technology and innovation, who want to exchange ideas and knowledge about these and related topics.

Spazio X

Visit to a library that has become a multi-functional community space. Managed by the association Noi Quartieri Trento Sud, the intent is to create an open space that values the multiethnic neighborhood, creating a space perceived as a common good, open to dialog and knowledge, and sharing of experiences.

Group 4

Forno Sociale Migola, Progetto Fionda, Intrecciante
8.30 - 13.00

Meeting point – 8.30 at Volunteer Info point - Via Manci, 2

Forno Sociale Migola

A public bakery promoting inclusion and social cohesion. The project, curated by Carpe Diem APS in collaboration with Germogli Odv, makes informality and spontaneity its guiding principles. It aims to generate opportunities to meet, build relationships and develop the community's potential so that it can take care of itself and strengthen its capacity to be a place of inclusion. The Migola Social Bakery is a bakery that is open to all, at which it is possible to produce bread, flatbreads, and pizzas for self-consumption in a welcoming community setting. Waiting times for leavening are an opportunity to forge bonds and exchange experiences. During the activity there is an operator who takes care of the technical part, i.e., dough and baking, and an operator who takes care of the social part, facilitating relationships and enhancing participants' skills.

Progetto Fionda

A project in collaboration between multiple organizations to encourage volunteering amongst youth aged 16-20.

Intrecciante

A small practical example of inclusion and intercultural dialogue. It interweaves the stories of young people with different backgrounds and experiences, among them: young social workers, young people waiting to have their asylum applications answered, refugees, university students, local soccer players; all actively involved in the organizational process that led to the birth of this unique association in the Trentino sports scene.
